

**Starting on February 15<sup>th</sup>, 2022**  
**I HAVE PLACED A SELF-IMPOSED**  
**“STOP-WORK” of all tasks related to**  
**DIRECT HOME CONSTRUCTION!**

- Despite repeated requests to the East Gippsland Shire Council, by written correspondence (in business verbal accounts are meaningless), to fix the adjoining property illegally constructed asphalt road and ugly back yard concrete block car park that were both built without guttering and without a certified accredited approved plumber approval, I had no other choice than to take this action.
- Rain water floods under the fence to my house foundations due to the adjoining property hillbilly halfwit being allowed to build without approval! All work here is now on the yard only.
- For over 5 years I have used every option possible to get council to supply planning documents and plumber approval documents or get them to fix it, but they have just ignored all requests.

**Da.Vinci.Place@outlook.com**

- All correspondence is to be sent using this email address.
- NO VERBAL COMMUNICATION ON THIS TOPIC WILL BE TOLERATED. WRITTEN COMMUNICATION ONLY.
- As per Building Permit rules which I like, the general public requires to be informed of property construction. All money allocated for the 2022-2023 Building permit has now been transferred to my lawyer.
