

Starting on February 15th, 2022
I HAVE PLACED A SELF-IMPOSED
“STOP-WORK” of all tasks related to
DIRECT HOME CONSTRUCTION!

- Despite repeated requests to the East Gippsland Shire Council, by written correspondence (in business verbal accounts are meaningless), to fix the adjoining property illegally constructed asphalt road and ugly back yard concrete block car park that were both built without guttering and without a certified accredited approved plumber approval, I had no other choice than to take this action.
- Rain water floods under the fence to my house foundations due to the adjoining property hillbilly halfwit being allowed to build without approval! All work here is now on the yard only.
- For over 5 years I have used every option possible to get council to supply planning documents and plumber approval documents or get them to fix it, but they have just ignored all requests.

Da.Vinci.Place@outlook.com

- All correspondence is to be sent using this email address.
- NO VERBAL COMMUNICATION ON THIS TOPIC WILL BE TOLERATED. WRITTEN COMMUNICATION ONLY.
- As per Building Permit rules which I like, the general public requires to be informed of property construction. All money allocated for the 2022-2023 Building permit has now been transferred to my lawyer.
- **www.dj-council-support.ueuo.com**
- *Here the public can stay up to date on every Council Interaction.*

'6-45 PM Tuesday 15-February-2022'

Good day Council,

FROM: Dean Jaye of 9 Outlook Avenue, Lakes Entrance.

After many times trying to get you to fix the non-VBA rules of construction for the non-guttered asphalt road and concrete car park connected to 11 Outlook Avenue, Lakes Entrance, and being ignored, I have had no choice but to invoke a STOP-WORK on any work on the actual house at 9 Outlook Avenue, Lakes Entrance until this multi-year situation is resolved. To have massive water flow from that property running onto my new home construction foundations is unacceptable. After years of clearing and digging channels in the rain to ease the flow hoping the illegal structures are rectified to building standards with guttering, this will no longer be tolerated.

A [website](#) has been created (and council was informed) just for this issue for General Public and Council information purposes. It is at

dj-council-support.ueuo.com

EVERYTHING pertaining to this issue will be there. Over time it will be updated to convey every development or lack of. I only do business in writing, so refer to that for email address and all communication. This text emailed to you is contained in version COUNCIL STOP-WORK '6-45 PM Tuesday 15-February-2022'. All later versions will be on the [website](#).

.....

When constructing my house (all building permit information is on the [website](#)) I have made it completely self-sufficient so there isn't one single service you provide that is of use to me. I just pay your rates even though it does nothing that contributes to the house. Your mail server has all my past communication to you and why I dislike for example, how your organization has played a huge part in making Australia so ugly and hideous from the beauty it had 300 years ago. That does not prevent people from still doing business together and co existing, even when a few years ago you crossed the line. I, like most people, if a child of ours, or a pet, (both of which are family), are threatened with being hurt or killed, I WILL RESPOND WITH FULL FORCE AND THE RULE BOOK GOES OUT THE WINDOW! Emotion is allowed to take over when that happens, and always will. So, when on one side the 11 Outlook coward owner was throwing poison over my fence, until I got my security cameras covering the whole property and trying to catch him, and on the other side, your council rangg-errs were making stealth trips and trying to damage my fence and scaring my dogs (that never have and never will hurt anyone) trying to make them escape and hurt them! I acted with emotion and will do so again if it happens.

As stated on other occasions, there is no service the council provide that my home uses. But that does not mean others who are adjoining and do have to not follow construction rules harming my house foundations, that the council does not do their job and enforce planning and construction rules all normal people follow.

A house is just an object.

It means nothing to me but a business process project that you complete.

So, I feel no emotion in business interactions, as you just need to know what does not follow building law, and if something does not, it gets enforced by the appropriate party. And if those responsible do not do their job, then you use your legal contacts to get it done and collect damages. Therefore, for all the information below, I feel really good in initiating the STOP WORK and working together with me lawyer, emotion free, getting this sorted. No family emotion will be used by me at all during this whole process getting to completion.

***The STOP WORK will cease instantly when one of two things happen;**

- Complete demolition of the Asphalt Road and connecting Car Park of 11 Outlook Avenue, Lakes Entrance, allowing plants to grow on the natural landform, absorbing 99% of the water as it did originally.
- I am sent ALL DOCUMENTATION, OR DIRECTION ON WHERE IT IS AVAILABLE for the Asphalt Road and connecting Car Park of 11 Outlook Avenue, Lakes Entrance from your Planning or some other department, along with an accredited licensed plumber documentation showing approval.

THE 9 OUTLOOK AVENUE STOP WORK that commenced TODAY WHEN THE BUILDING PERMIT EXPIRED

1. The funds that were saved for the Building Permit are now allocated to my lawyer until the STOP WORK is over and all legal activity ceased.
2. My lawyer will only be involved with advising me, only getting involved when there is an impasse.
3. I was first advised to establish the timeline of how long council has known about the non-guttered construction of 11 Outlook Avenue, Lakes Entrance, ONLY IN WRITING OR TRACEABLE RECORDS. That was completed a few months ago.
4. **The start of the timeline** was when Findlay the Building Inspector I unfortunately employed (I stupidly and can't believe I did it did business based on the inane chatter of a member of the dog club). He was so terrible and I found out what he was when he sent me an irresponsible stop work on my property, PUNISHING ME for keeping him informed on techniques of diverting water from the non-guttered construction of 11 Outlook Avenue, Lakes Entrance, away from my home post holes for the stumps! He did NOTHING about non-guttered construction of 11 Outlook Avenue, Lakes Entrance! The emails are on the [website](#) and show years ago when Council knew about it because Findlay had allegiance to his council mates, not his client. So, council knew about it. It was supposed to be 50% me, 50% council allegiance. Not even close. Not Findlay. The dog club people said his wife was a nice person, not him. Should not have been so lax in business but I thought hire a community person. NEVER AGAIN. When questioning my next building inspectors, I conducted the 'Findlay Test' when selecting. He will commence when the stop work is over.
5. Leigh Collings of Council was wonderful in preventing the Findlay stop work. Back then nothing was built to protect items that enabled the house to be built. Victims of rats and weather. So, I had to shut up with Findlay and build belongings cover first ASAP. After trying to remove his services, during which he smirked about how he still gets his money regardless. I had to grit my teeth for years stuck with Findlay (later on he was nicer no doubt some guilt but you judge a person when they deem themselves to be in power, not the opposite) and was ecstatic when I found out he was retiring. 😊 The Findlay test for Building Inspectors, after never having needed one before, is vital. Don't want Findlay Version 2. Leigh I would have gladly worked with at Council but I traced his emails to giving the Council rang-ers information that would contribute to hurting my family. So, I abandoned that idea. Work from afar.
6. **The latest marker of the timeline** was when I orchestrated the police to video and written record the water gutter situation and document it a few months ago. I verified later the police actually contacted the council. So as advised, I have a legal solid timeline of Council knowing of the water flow to my house foundations from non-guttered construction of 11 Outlook Avenue, Lakes Entrance.
7. My life is so relaxed EXCEPT FOR ONE THING. Because the water issue means I have to have dealings with the 11 Outlook low IQ Cretan. The stop-work the only way to sort this last life irritation. Until the water situation to my foundations is fixed, I cannot build a large steel fence

separating us forever because the water in a few years would corrode and destroy the expensive property separator.

8. When building a home council requires keeping the General Public up to date with everything that is going on as I have done to date. The front entrance property signs I put up a few days ago have all details to access the [website](#) that I created to keep council up to date. The signs are included in the attached pdf to this email and are exact copies of the signs. The pdf signs are also viewable always on the [website](#).
9. I will not advertise the site or any conversations on internet search engines and social media. That will only happen if I get advised that irrational business behavior is being observed. Otherwise not.
10. During the stop work when I attend the property NOTHING on the house will be constructed. I will only care for and attend to my family dogs and all pertaining to their physical and mental health. As emailed, my body is in physical pain when I do physical work due to hardship in the completion of the house structure. I can still do some work but in small doses. That work will only be on the property like digging pipe ditches and maintenance. No house new construction will take place at all.
11. When the stop-work ceases, I will then allocate my money to hiring the next 'pre quizzed' building inspector to initiate the processes to allow recommencement of the house construction. If any ego driven non moral business processes happen during that stage, then my lawyer will continue to receive money to sort the situation. Any delay of that will delay the house completion and result in damages collected by my lawyer.
12. This document will be the sole record of this entire process and the latest version always published on the [website](#). New points will be numbered and dated. All points will maintain their original number and be untouched so as to provide a concise reference to known points.
13. All communication with me is dictated by the fair both party respectful processes, as I have used for my entire time at my property. No deviation from these courtesy rules will be tolerated.
14. Communication by the General Public is provided clearly on the front entrance property signs by email. Any assistance you require of me, feel free to email at any time via the [website](#) and front entrance sign avenues as I want to get rid of the last semblance of that mentally ill weirdo 11 outlook interaction from my life as fast as possible and finish my house. As do you. He has cost me so much time and money already.
15. The [website](#) will be updated and made smoother over time, providing you a better information experience to resolve the stop work, than this initial [website](#) version.
16. I have created a fast search engine for my mail server of every email I have sent or received in over 30 years, available at an instant. Should you require any email I have ever sent or received by you and want it made available on the [website](#), let me know along with the search options.
17. The stop work can be stopped so easily. All illegal structures in the modern day can be investigated back to the source and the offending parties deduced, whether a combination or a sole perpetrator. I already know what happened, but I have to waste time with a stop work or legal process to extract out the guilty. You can wrongly do what you did in court with the multi million dollar council building on the Lakes Entrance hilltop, or you can just do as per your job description and "pretend a high ranking council official was building a house at my property and what they would do in a second to 11 outlook"... we both know what would happen if that was the case 😊. Just do that then you will never hear from me again. The ball is in your court.

- **POINT 18**
- '4-05 PM Tuesday 22-February-2022'
- Old Building Inspectors emailed me with last ever correspondence.
- LAST CORRESPONDENCE to Findlay Building Inspector {20220222154143} 3-41 PM Tuesday 22-February-2022.pdf
- Specified due to stop work and us ceasing business a week ago, no building correspondence between us ever needed again.
- Specified my lawyer and I observing if council force the non-guttered non plumber approved construction of 11 Outlook to be fixed before he sells? If the council allow selling of the property knowing the existing owner completed two construction entities that did not get approval from a licensed plumber, then all legal actions that happen to get the construction fixed with plumber's approval will just be actioned on council alone. We will not be chasing up an owner that was allowed by council, to sell a property with non-plumber approved construction that he created, that floods water onto a lower different property.

'Thursday 7-Apr-2022 2:13:05 PM'

This is today's council ignoring fixing a problem they allowed to occur, COUNCIL ALLOWED Non Plumber Approved Asphalt Road and Concrete car Park at - 11 - Outlook - Avenue Lakes Entrance. The 4 rain days in the last week FLOODED WATER FROM THE NON GUTTERED CONSTRUCTION ONTO MY HOUSE FOUNDATIONS. This logged event and full description of the long term 6 year wait for council to fix their mistake of allowing an incompetent citizen to build non guttered structures, is all recorded on the website

<http://dj-council-support.ueuo.com/>

Also which is amusing, the 11 - Outlook owner is currently trying to sell their property to avoid fixing the illegal non plumber approved construction Lol. If he succeeds then all my legal action will just be on the Gippsland council alone.

Regards

J rate payer

RAIN LOG on NON GUTTERED Council Allowed ASPHALT ROAD and CONCRETE BLOCK CAR PARK

I saw on security camera footage you organized to fix the gutter that was caused a few years ago by your road crew, when the carpet that was laid down to sit concrete deliveries on was crunched up into a ball and left as your hired road crew laughed about it to be a smart a-s-s and left it blocking the gutter pipe. They could have cleaned it up easily or not done it at all but purposely laughed and made an immovable by hand carpet dirt ball. I have video surveillance footage and audio if you want. So when you bill it, do not do creative accounting adding it to my rates. Your own road crew caused it as per my video. It was a temporary delivery bay that could not be seen or impeded passing motorists and stopped soil erosion. And then as I emailed a few years ago, to my amusement at the power trip logic, tried to charge me with littering for something the COUNCIL CAUSED! It was as absurd as the Findlay Stop Work threat as I was protecting the house foundation post holes from water THAT WAS COMING FROM THE NON PLUMBER APPROVED NON GUTTERED UPPER OTHER PROPERTY! lol! There is nothing worse than something you build being water damaged by incompetence of someone else's stupidity lol. You cost yourself money fixing something you organized?!

Oh yeah, that sounds familiar :) It rained yesterday and my house foundations were flooded with water from the non guttered 11 Outlook property! This log and all others available at

<http://dj-council-support.ueuo.com/>

The 11 - Outlook owner is currently trying to sell their property to avoid fixing the illegal non plumber approved construction Lol. If he succeeds then Council is the only one responsible if you let him go without getting him to fix his construction with registered plumber approved documentation shown.

You have NOT ANSWERED THE emails. Business Excellence lol.... Who self-branded that inappropriate name. 😊 I have tears in my eyes laughing 😊))) Magnanimous out of control 😊

The EXACT QUESTION IS: SEND ME EVERYTHING that involved the construction, and I mean everything, of the asphalt road and concrete block back yard. And also there is documentation because the fool at 11 outlook built a non-plumber approved drain. HE DID NOT DO THAT OF HIS OWN VOLITION 😊 No human does unless forced. SEND ALL DOCUMENTATION, EVERYTHING IN HISTORY, REGARDING THE ASPHALT ROAD AND CONCRETE BLOCK NON-GUTTERED back yard of 11 Outlook.

THAT IS THE QUESTION.

Awaiting a copy by email of EVERY SINGLE COUNCIL DOCUMENT regarding the asphalt road and concrete block back yard of 11 Outlook Ave.

- Lol.... A council does not permit random citizens to make asphalt roads and ugly concrete car parks. Awaiting ALL THE DOCUMENTS that we both know exist. I am NOT using your bogus diversion solution scam. I will not stop, nor will my team, UNTIL I get council documentation on those two non guttered non plumber approved entities. THE STOP WORK WILL CONTINUE UNTIL THAT TIME.

We pay our respects to all Aboriginal and Torres Strait Islander people living in East Gippsland, their Elders past and present.

.....

(Thursday 28-Apr-2022 5:32:08 PM)

I don't read attached files which are company pre formatted spin.

All messages received from you that have attached files are deleted by the firewall. Only good business contacts are allowed by the firewall to be passed.

Lazy organizations who are using spin to hide details use the attached file. Put all your messages in the body text else it does not get read.

I had such a great laugh reading that letter that if paper, would only be fit for toilet paper. Lol... I was so lucky to work for a powerful large logical German corporation for years, so it is painful to have to deal with the strange disturbing persona that council employees get after a few years service. Even when stealing money from rate payers like the Lakes Entrance building on the hill, etc, you just do your spin and pretend it didn't happen. Like the council Rangg-ers a few years ago while my dogs and I were on private property, and the council rang-er came on to the private property and tried to give me a dog fine notice! Dog Barking and the archaic church based council processes ask the dog owner to write a bark log and the moro-n complainer does not do a log at all! 😊 And then, how does someone working in this department name themselves with EXCELLENCE 😊. That word is awarded not self branded. I corrected it below. Endless stupidity. Good thing is, I have been advised, give them time, record everything, and they either supply the Documents or they don't. And if they don't then my team will use that. Either way, documents or not, the stop work stays until from the day the Findley fool threatened a stop work for the illegal 11 outlook water floods 6 years ago, the non plumber approved structures are removed or fixed.

Felt like a vent so giving you more words. But after this I just log your responses on the website and if needed, social media it until Council fixes their screw up. Like at 7 Outlook, yes, Council at fault, they fixed it. I will not stop this entertaining process until the 11 Outlook screw up is fixed as well. AND it is only fixed when I get a licensed plumber approval on the structures. And if I do not, all documentation for the asphalt and concrete. Low IQ processes such as this, where I know exactly how the road and concrete came about, but I have to do the 'dance' of business with the council to document the truth on the asphalt and concrete. But note... I have facts and proof on my side, all you have is spin and delay like what failed in your legal battle regarding the multimillion dollar Lakes Entrance hilltop building. The dance only ends one way. Haven't proof read this cause I don't care. My website has all the details. This email is nothing, as was your spin pathetic letter.

Right lets continue the dance....

*I don't remember when asking for: non plumber approved asphalt road and concrete block back yard structures without guttering documentation to be forwarded to me,

INSTEAD getting the rubbish you sent me that was meaningless (shows how stupid the General Public is if they accept and follow absurd letters like you sent)

"Dear BusinessPestilence, I would like you to investigate yourself and find yourself not guilty. Then send that result to the rate payer, even though it has nothing to do nor ever requested by the rate payer. Then even with the spin incompetence thus far, give some bum-steer (avoidance diversion) reference to a pointless follow up direction for the rate payer to follow. And even though our bum-steer directive was given, because a Council can do disturbing strange actions, expect the rate payer to be so stupid that they accept all this and not try to get their original unanswered request from the planning department answered because we are council and even the stupidest of council departments can say anything and actually believe it to be correct and right. No matter how absurd"

Yeh, right 😊 I didn't request that ever...

NOTHING CHANGES and STOP WORK STAYS until Council caused problem of 6 years is fixed and illegal water flow to my house foundations no longer occurs. And it does not matter how long this takes because all costs incurred will be recovered in damages.

'6-01 PM Thursday 28-April-2022'

From this moment no emails will be read that have attached files from this council department UNLESS the attached files are the required documents. If the body text does not specify the words "THE NON GUTTERED ASPHALT ROAD AND CONCRETE CAR PARK" entire planning department history files are attached. And if you body text those words and the attached files are not exactly that, then my lawyer will love that.DONE. *This is logged on the website for your convenience.

Dear Mr Jay

Thank you for your emails of 27 and 28 April 2022 regarding the above and wish to advise that your request has been reviewed and assessed.

I wish to advise that responses to your queries were provided in our response letter to you of 1 April 2022 (emailed 4 April 2022), where you were advised 'that no Council approval has been given, as a Planning Permit is not required for these works'. You were further advised that it 'is a civil matter and not one which Council can address'. Contact details for the Dispute Settlement Centre of Victoria and Victorian Civil and Administrative Tribunal details were provided to you to address your concerns.

You were also advised that your complaint about unlicensed or unregistered plumbing works at your neighbour's property are not matters which Council enforces. You were advised that the 'Victorian Building Authority (VBA) is the agency responsible' and contact details were provided.

Also, I wish to advise if insulting or offensive language is used in any of your communications with Council, you will be required to resubmit that communication using acceptable language and your communication will not be addressed until it is resubmitted in a more acceptable form.

Kind regards,

Peter Cannizzaro ☐ General Manager Business Excellence ☐ East Gippsland Shire Council

Good day my gov human ant master of spin and dysfunctional illogical response department,

Couldn't see any planning department documents in your as usual, useless response. So stop work continues until I get the documentation for the asphalt road and concrete block you allowed to be built. So funny speaking to a human gov ant. Highly amusing as I temporally do the inept council dance of incompetence until I get bored and sik my lawyer onto you. Lol

So funny, didn't see an engineer report in your investigation lol. You council people so creepy weird mannerisms actually believe it you print up a company letter with any crap on it, that it is right. Ever heard of discovery :-) in the courts?

Stop work continues. So glad i worked for powerful logical companies and didn't get messed up mentally working in a council of bank of government weird career lol.

Next rain day will update you with my court log.

Subject: RAIN LOG from Council Allowed NON GUTTERED Construction

'2-14 PM Thursday 5-May-2022'

Nice drop of rain last night... a nice drop when RIVERS OF WATER FLOW from an adjoining property that has council allowed asphalt road and concrete block car park construction THAT DO NOT HAVE PLUMBER APPROVAL do not flood onto my house foundations...

Huge volumes of water flow from 11 outlook to 9 outlook happened again... as per last 6 years when i first alerted you to a problem you allowed when not checking that 11 outlook property tool build the asphalt concrete was legal. :-) Incompetence.

All details on the illegal construction and water flow is at

<http://dj-council-support.ueuo.com/>

where this log will be placed as i wait for the PLANNING DOCUMENTS for the 11 Outlook fool and his non plumber approved construction. :-) In my career I was raised on 'see problem - use logic - fix problem' when at Siemens. Moronic useless to rate payer organizations such as BusinessPestilence.gov.au that are alien and opposite to a real company like Siemens, all their attached Documents that do and contain nothing are ignored. Unless it says THE ATTACHED PLANNING DOCUMENTS ARE ATTACHED, they are auto deleted. Organizations like BusinessPestilence.gov.au would never survive with their weird dysfunctional business operations in the real world. Church based council systems a joke and like most people, ignored as their actions useless and their letter content a farce of nothingness. I would shoot myself in the head before ever having a pointless career with BusinessPestilence.gov.au or a gov minion or a bank :-)

NOTE: My response harshness proportional to the level of incompetence from .gov correspondence. I miss Siemens so much :-) Normal efficient and logical.

Regards J rate payer
